TRANSFORMING HEALTHCARE TO THE INFORMATION AGE

Brought to you by

ET **Edge**

An Economic Times Initiative

www.et-indiahealthcare.com

India is currently the second most populous country in the world with average age of nation citizen between 32- 34 years. With population rising further both in volume and age, increase in the number of occupational health hazards, augmented health awareness and medical tourism – the demand on healthcare delivery has intensified manifold.

While varied measures have been taken by stakeholders, medical reach to all still remains a distant vision because of infrastructure, costs and accessibility. However, one of the foreseeable solutions to all these can be to leverage innovative and latest technology which will not only increase point of care but success rates of preventive and curative medicine as well.

The population of India is 1.21 billion (Census 2011) with 68.84% of people living in rural areas and 31.16% in urban locations.

Indian healthcare industry is \$65 billion in 2012 and is expected to reach to \$100 billion by 2015 – Fitch Ratings

India's healthcare information technology market is expected to hit \$1.45 billion in 2018, more than three times the \$381.3 million reached in 2012) – Frost and Sullivan

India, already home to technocrats and steadily rising literacy rates have been witnessing increased adoption of telemedicine, HIS, electronic health records, mHealth, and web-based services.

However, while many initiatives have been taken in this direction, there are few critical challenges that need to be addressed before Indian healthcare delivery can move further in this direction. These include data assimilation and analysis, confidentiality and security of records, large storage capacity, 360 degree infrastructure, skill development of human resources among other issues.

Economic Times - Vouching for a Healthy India

The Economic Times has always associated with the cause of national development and strongly believes that a seamless healthcare delivery system will be one of the key pillars for the future growth of nation. Considering this, we bring together visionaries and senior leaders from government and private sector to discuss how technological intervention can help in creating better service delivery and find optimal solutions to challenges in implementing these systems.

Advisory Board

Andy Fischer
President
ISfTeH and CEO Medgate
Switzerland

P Namperumalsamy
Chairman Emeritus
Aravind Eye Hospital
Madurai - India

Petros Tsipouras
Department of Genetics
Yale School of Medicine
Yale University, New Haven
Connecticut - U S A

Ruchi Dass
Advisor
mHealth/ICT Readiness
Advisory Group
World Health Organization

Sangita Reddy
Joint Managing Director
Apollo Hospitals Group
India

Suptendra Nath Sarbadhikari
Director
National Health Portal

Above advisory are invited / confirmed

09:15 - 09:45

REGISTRATION & REFRESHMENTS

09:45 - 10:15

Chief Guest Address: Swasth Bharat: Ensuring healthcare to all
Lov Verma, Secretary, Ministry of Health, Govt. of India

10:15 - 11:15

Panel Discussion 1: From Planning to Implementation – Pre-requisites in creation & management of Health Information system

Jagdish Prasad, DGHS, Govt. of India;

R S Gupta, Deputy Director General, RNTCP – MoHFW;

V K Subburaj, Secretary, Department of AIDS Control, MoHFW;

Girdhar J Gyani, Director General, Association of Healthcare Providers

Moderator: *Neena Pahuja, Director General, Ministry of Communication and IT*

11:15 - 11:45

Case Study Presentation: World of Health: Successful Case Studies of Healthcare Delivery Through Technology

Nata Menabde, Representative to India, WHO

11:45 - 12:45

Panel Discussion 2: Technology For Healthcare Delivery: Diagnostics, Screenings & other Preventive Care

Sanjeev K Chaudhry, MD, SRL;

Manoj Shah, MD, Mastel India;

A Velumani, MD, Thyrocare;

Ameera Shah, MD, Metropolis Healthcare

Moderator: *Charu Sehgal, Senior Director, Strategy and Operations Division and Head, Healthcare Vertical, Deloitte*

12:45 - 13:45

LUNCH & NETWORKING

13:45 - 14:15

Post Lunch Opening Keynote: Rural Health - Technology & Private Sector
Dr. Harshvardhan, HFM, National Health Mission

14:15 - 15:15

Panel Discussion 3: Latest in Curative Technology: The Way Forward for Healthcare in India

S S Badrinath, Chairman, Shankara Netralaya;

Sanjiv Navangul, MD, Johnson & Johnson India;

Aijaz Tobaccowalla, Country Manager, Pfizer;

M C Mishra, Director, AIIMS

Moderator: *L P Singh, Director, IIHMR Delhi*

15:15 - 16:15

Panel Discussion 4: Data Management: Challenges in Data Accumulation, Analysis, Confidentiality & Storage in a Quality Driven Healthcare System

S K Das, DG, CSO, Ministry of Statistics & Program Implementation;

Bimal K Roy, Director, Indian Statistical Institute;

Vikram Tiwathis, Associate Director, COAI;

NK Dhamija, MOHFW, GOI

Moderator: *L S Satyamurthy, President, Telemedicine Society of India*

16:15

CLOSE OF CONFERENCE

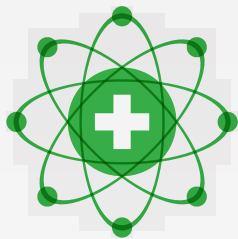

REASONS TO ATTEND:

- Get an overview of the current standing of Healthcare IT in India
- Case studies focused on the lessons learnt and challenges faced in live Healthcare Informatics Implementations
- Meet, network and learn from the experiences of top industry experts, practitioners and professionals from top Hospitals & medical bodies in the region
- Gather fresh, new and practical insights across the Healthcare and Information Technology transition and value chain
- Scope for efficient planning & understanding Healthcare IT eco-systems through HIT driven presentations and case studies

WHO SHOULD ATTEND:

- Medical directors • Health Care Chief Information Officers (CIOs) • Healthcare Systems Managers
- Clinical Information Officers (CIOs) • General Practitioners (GPs) • Healthcare Managers • Heads of Commissioning
- Directors and Heads of IM&T, IT and ICT NHS Trust chief executives • Senior nurses • Finance directors
- Clinical Directors • Healthcare IT Project Managers, Procurement Directors, Information Security Directors, Tele-Care Project Managers • Independent healthcare sector Health policy makers • Heads of Information Governance
- Data centre managers • Focused professionals interested in healthcare interoperability
